

Dear Members,

Here we are and spring time is upon us with the gardens starting to come to life with the crocus and daffodils swaying about in the breeze.

Instead of celebrating the 250th. edition of our newsletter who would have thought that the world would find itself in such a dangerous situation with an unprecedented global pandemic.

As miniaturists we can use the time in isolation to catch up on our projects and learn new skills from watching Youtube videos and reading our dolls house magazines and books that we have collected over the years. I'm glad I kept mine!

I am taking this opportunity to finish projects and so far I have made a start on a total restoration of the old pub dolls house that my brother rescued from a bonfire. It is a 12th scale tudor design so I have been doing research and found a building like it and I am referring to it for ideas. I have also finished some low relief petite properties for the railway that Paul is building. I am thinking of making some more peg doll models as I haven't made any for awhile. I may have a go at making a box file shop before too long. So, plenty to do!

March Meeting.

The Methodist centre contacted me to say the centre will be closed until further notice, they will let me know when we will be able to return.

So the March meeting was cancelled due to the coronavirus restrictions. The next meeting will be held as soon as restrictions are lifted.

In the meantime we can finish our 'Christmas present' rooms. Until we can meet up again let me know how you are spending the lock down and what minis you are doing. Send me photos and I can put them in the next news letter.

Until then and until we meet again, stay safe, and keep mini-ing.

Beverley

Next Meeting:

Cancelled until further notice.

Dates for your diary 2020

All cancelled - stay safe.

Ann's room box. It looks so comfy. How many separate items can you count?

Petite Properties 'Station Road semi' in 'N' gauge (148 scale) that I made for Paul's model railway. It is 'low-relief' meaning it is only half a house and goes up against the back scene.

I made the washing and the broad beans, next I have to make some 2mm high pigeons for the pigeon loft out of Fimo.
