

Dear Members,

October's club night arrived but unfortunately several apologies came from members of not being able to join us due to illness and other commitments and so due to a low turn out we decided at the last moment to cancel the meeting.

Miniatura was held at a new venue at Stoneleigh Park, near Kenilworth. Ann went along and she found it spacious and not crowded and plenty of stalls. I have since found a you tube video by Julie Warren of her visit to the show. It is a good coverage of the show with useful websites to visit.

The York Dolls House Fair is on 21st November at York Racecourse.

Liz Ford, has sent us an email letting us know what she is up too. Nice to keep in touch with past club members and friends.

Guess what? I have managed to bag a Petite Properties Advent Calendar so pleased. I nearly gave up trying, Paul encouraged me to carry on and managed to get one at the 7 o'clock listing. This was the third time I had tried over the past three years. Once Advent is over and I will be able show and tell you what they are.

The 'coffee shop' is starting to take shape. I have made most of the fittings and furniture and now time to build the exterior. This has been hard at times as the instructions were a bit complicated to follow at times due to the English/Chinese translation but I have managed so far. Time to think of another project. Might be something for Paul's N gauge railway. (148th scale).

I had put together a hobby horse kit to for the evening make so I shall bring them along for the November 17th meeting as it will be a bit of a Christmassy item to make. Hopefully, more of us will be able to come along.

Beverley

More extremely small 148th scale models by Ann.

Ann has sent in several photos of item that she has made over the last few months. The food looks good enough to eat!

The Coffee shop is almost ready to put the walls up. Making the lights was quite fiddly.

I have spent this month making a catalogue of my craft items and printing labels for the storage boxes. I now have a forty page reference book and two storage units nicely stacked.
